OUR SERVICES

What we do.

We help buyers, suppliers and authorised representatives organise the information and introductions a potential transaction needs.

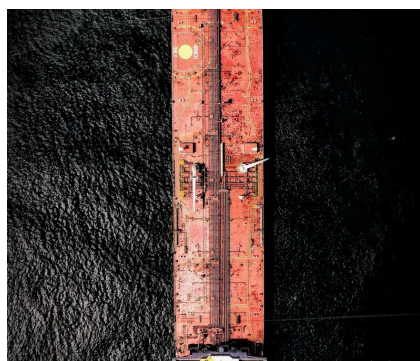

Oil & energy

Commercial sourcing and placement discussions for crude oil, diesel / AGO, gasoline / PMS, Jet A-1, fuel oil and base oils. Gas and LNG opportunities are considered where suitable supply, infrastructure and qualified counterparties are available.

Natural resources

Selected minerals, metals, agricultural commodities and industrial raw materials. Opportunities are reviewed by product, grade, origin, quantity, documentation and proposed delivery terms.

Commodity brokerage

Buyer and supplier sourcing, commercial introductions, offer presentation, negotiation coordination and documentation support. Roles, responsibilities and any brokerage compensation should be agreed for each transaction.

Sector photography illustrates commercial categories, rather than company-owned facilities.

OUR APPROACH

How we work.

A clear requirement, appropriate verification and documented terms create a useful basis for commercial discussions.

01 **Share your requirement**

Product, specification, quantity, location and proposed terms.

02 **Initial review**

Commercial fit and any information needed to clarify the enquiry.

03 **Relevant verification**

Parties, authority and documentation, appropriate to the transaction.

04 **Commercial matching**

Potential introductions where a suitable opportunity exists.

05 **Discuss and document terms**

Pricing, delivery, inspection, payment and responsibilities.

06 **Contracting and execution**

Parties proceed under their executed agreements and conditions.

07 **Follow-through**

Communication and coordination within our agreed commercial role.
